

Acidosis Linked to Vaccine Ingredients

Cancerous cells grow well in acidic mediums; therefore an acid pH actually accelerates and increases the possibility of cellular mutations (Cancer).

Vaccines have ingredients that will feed acidosis to the cells in your body. Here is just a sample of vaccine ingredients keeping your body in an acidic state:

Aluminum phosphate
Animal tissues: pig blood, horse blood, rabbit brain,
Dog kidney, monkey kidney,
Chick embryo, chicken egg, duck egg
Calf (bovine) serum
Formaldehyde
Gelatin
Glycerol
Human diploid cells (originating from human aborted fetal tissue)
Hydrolyzed gelatin
Monosodium glutamate (MSG)
Phenoxyethanol (antifreeze)
Polysorbate 80
Porcine (pig) pancreatic hydrolysate of casein
Sucrose
Thimerosal (mercury)
VERO cells, a monkey kidney cells

Cancerous cells do not contain hydrogen atoms. When healthy cells have plenty of hydrogen they cannot become cancerous. If we can get hydrogen into any unhealthy cells, they can heal.

How can we get hydrogen naturally into our cells? Click here to learn more about the

10 Reasons To Avoid Acidosis

<http://www.WakeupGethealthy.com>

The solution is to Increase your pH level to have Better Health, Longevity and keep Cancer away.
